I am Ludon from LudonGames and I am working on this game since December 2017. I tried many different weapons in the first person shooter game genre but this is the best one that I ever created. This game is totally free and easy to play. I had 1,000,000 downloads in December, February, March and in April with just 18 months of release on each month. If you can imagine this, then you will agree that this game is well estimated. The game is hosted on Google Play Store and on pwetris-game.com. I have a ranking on Google Play Store 4th place and 1st place on pwetris-game.com. So don't miss this game! WARNING: There is a new penal law from the government. You can get fined up to \$3,000.000 if you are caught stealing money and run away with it. But if you are well prepared and you act well, you won't get caught because they have so many police forces and criminals on the streets. Take care of that carefully. Criminals Bundle Video: Criminals Bundle Soundtrack (I Don't Care Music) RIFLE HOW TO REQUEST NEW MAPS Criminal Bundle is a first person shooter online multiplayer with low poly esthetic. Shoot other players while trying to open the safe or prevent criminals from run away with the money. Don't be fooled by the low poly art! In Criminal Bundle you will need to master the police strategies so that criminals do not escape. You and your teammates will have to decide how to act in the robbery, what weapons you should use and what will be the breaking and entering zone. But as a criminal your strategy will be totally different. You must get to the bank and break the safe. Then, take all the money and run for your life. Don't

The game takes place in an old and abandoned factory building. It's easy to see this from the sky view. You can easily recognise the area from the map name. The overall goal of the game is to collect all the money in the safe and leave to safety with all the money. You must make some choices to do your job. Those are: You can leave the gun in the safe, you can leave the gun and have a hand in the safe or you can use it to shoot. The guns you can use are: Sniper, Pistol, and Light Gun. Weapons are transported to the safe in the safe. You can see the map name at the top of the screen and you can see your team and opponents with the name. In the bottom right corner is the time. You can pause the game and you can play on a new map. Gameplay is easy. You just need to think about how to break the safe in the shortest time. To open the safe you will use a pick, a crowbar, a hammer and a sledge. If you open the safe you will see the number of money inside. If the money is less than 10.000 you win, if it is more than 10.000 the only way to win is to cheat and take the money by force. A gun is a tool to protect yourself, but a weapon is more dangerous than a gun. If you use a gun with a power up in the safe, it will do more damage and kill the players fast. You can always get a new weapon with a power up by killing other players. The money counts on the safe. You can get to the next level by killing other players. If you kill a player you get your money. The people who die do not get anything. When you kill a player you get a voice chat and if you win the money you get your team mates to join. If your team mates join you will help them. Be careful though they can join and not help you. Be careful when you are helping, you can get killed and die. You can also die by knocking other players because they do not get anything if they get killed. You can see how the other players look in the game by looking at the right of their face. You can check the health of the players by looking at the right of the face. The cash will grow faster. If you kill people fast you will have more money. You must balance your time to get the money. Customization: As you can see
